Iyinoluwa Samuel Adejumo

Edmonton, AB | 825-461-6947 | iyinade64@gmail.com | www.linkedin.com/in/iyinadejumo | https://www.iyinoluwa.site/

HIGHLIGHTS OF SKILLS

- Engineering Expertise: Petroleum engineering background with experience in well simulation, production optimization, and artificial lift system design using PIPESIM and OLGAS models.
- Operations Leadership: Experience managing frontline teams in a high-volume logistics environment, including scheduling, performance coaching, quality assurance, and cost-saving process improvements.
- Software Development: Proficient in HTML, CSS, JavaScript, Python, TypeScript, React, React Native, and Node.js; experienced in building responsive web applications and mobile apps.
- Communication & Project Management: Strong ability to convey technical information, work effectively in teams, and manage complex projects from concept to completion.

EDUCATION

BSc in Petroleum Engineering *September 2020 – April 2025*

University of Alberta, Edmonton AB

RELEVANT WORK EXPERIENCE

Area Manager *January 2026 – Present*

Amazon (YEG2) – Acheson, AB

- Lead and coach a team of approximately 80 associates within a high-volume fulfillment center, overseeing scheduling, performance management, and daily execution against productivity and safety targets.
- Train and quality-coach new hires, ensuring adherence to safety, process, and quality standards throughout onboarding.
- Coordinate cross-functional operational projects aimed at maximizing cost efficiency and improving process performance.
- Monitor real-time performance metrics to identify bottlenecks and drive continuous improvement across the work area.

Petroleum Engineering Software Developer *September 2025 – October 2025*

University of Alberta – Edmonton, AB

- Developed and modernized a Petroleum Engineering PVT lab platform using Python integrated with MATLAB Engine.
- Transformed a legacy PyQt + MATLAB desktop application into a web-based interactive tool using Streamlit, improving usability, accessibility, and student learning experience.
- Deployed and published the web-based PVT lab application for public access: https://pvtlab.uofapvtlab.app/

Society of Petroleum Engineers (SPE) – VP Tech *July 2024 – April 2025*

University of Alberta – Edmonton, AB

- Independently initiated and developed the official SPE group website using React and CSS, improving the group's digital presence and event registration processes.
- Collaborated with club leadership to coordinate seminars and networking events with industry professionals.

Founder & Developer *June 2025 – Present*

UniSettle (Mobile App for International Students) – Edmonton, AB

- Designed and developed a cross-platform mobile app using React Native, Expo and Node.js to guide international students through essential settlement steps in Alberta (e.g., obtaining a SIN, Alberta ID, housing, and local services).
- Implemented a business listing feature for local entrepreneurs to advertise services to students.
- Developed a landing page for the app: https://www.unisettle.ca/

ADDITIONAL EXPERIENCE

Sales Associate, American Eagle *June 2023 – Present*

Edmonton, AB

- Delivered outstanding customer service to guarantee a satisfying shopping encounter.
- Exceeded sales targets through effective product knowledge and selling techniques.
- Maintained orderly and aesthetically pleasing store displays to draw in customers.

PROJECT EXPERIENCE

Petroleum Production Operations *January 2024 – April 2024*

Reservoir Engineering (PET E 366) – University of Alberta

- Optimized artificial lift systems (Gas Lift and ESP) by reconfiguring injection rates and well completion design after identifying flow efficiency bottlenecks, leading to a 15% increase in production efficiency in carbonate reservoirs.
- Achieved wellhead pressure matching within ±20 psi using OLGAS 2-phase flow model in PIPESIM.
- Performed tubing sensitivity analysis, selecting optimal diameters (3–3.5 in) for maximum flow rates across three wells.
- Conducted thorough nodal and sensitivity analyses.

Development Plan for Upper Mannville, Alderson Field *January 2025 – April 2025*

Capstone Project (PET E 496) – University of Alberta

- Evaluated reservoir with low permeability (0.02–10 mD) and high water cut (~69%) under strict budget constraints.
- Performed reserve estimation using volumetric, decline curve, and Accumap methods.
- Built full-field CMG simulation models for six development scenarios, including water, gas, and solvent injection, as well as infill drilling.
- Determined that converting two wells to water injectors was the optimal short-term EOR option, with a forecast NPV of $11.5 M over 10 years.
- Designed cost-effective waterflooding implementation plan utilizing existing infrastructure and produced water to minimize CAPEX.

LICENSES & CERTIFICATIONS

- Association of Professional Engineers and Geoscientists of Alberta (APEGA), Engineer-in-Training (E.I.T.), Registered 2025

SKILLS & ABILITIES

- Soft Skills: Problem-solving, Communication, Team Collaboration, Project Management
- Tools: Microsoft Office (Word, Excel, PowerPoint), PIPESIM (Well Simulation), CMG.
- Technical Skills: HTML, CSS, JavaScript, Python, TypeScript, React, React Native, Node.js, Git
- Certifications: Wellbore and Pipeline Modelling using PIPESIM
